

Sub B1

Abstract of the Disclosure

An elongated missile launcher cell is
structured to allow arraying into multiple cell
array. Each missile launcher cell of the array
5 includes a support structure which accommodates
a canisterized missile. Each cell also
includes its own chimney and exhaust gas
plenum, so that it may be used individually.
since each cell has its own missile exhaust
10 capability, there is no need to keep one or
more bays of a missile launcher array vacant to
provide for venting of exhaust gases.
